3rd Round : 24th - 26th May 2009, Dubai, UAE

Greatest Port Disaster

On 16 April 1947, at the port of Texas City, **failure to deal correctly with a small fire** on board a vessel loaded with fertiliser led to the explosion of an ammunition ship. The resultant fires and devastation caused the **deaths of 750 people and \$100,000,000 worth of damage.**

In any Response planning, the first thing to ask is
“what possible critical incidents could we face?”

The second is
“what resources do we have, or need to obtain, to deal with each of these possible scenarios?”

**“All things can be forgiven
if we can progress”**

Cat Stevens

“360BSI is very focused and committed in delivering not only the best practices, but new strategies in business information and solutions. You can be assured that all our programmes are of the highest quality.

Adrian was rated 10/10 in all his past trainings.”

See you on-board!
Samsudin, Director 360 BSI

“We deliver professional quality training that cover all aspects, but we will not teach you something that you will not use in your everyday role. I guarantee you will walk away from the course with an increased knowledge and understand of both the technical and practical aspects of Emergency Response.”

Regards,
Adrian Francis, Principal Director ASSI

INTRODUCTION/ COURSE OVERVIEW

The Certificate in Emergency Response Management is a formally recognized academic qualification and is also recognized at higher education level. The units contained within the certification are endorsed by the Australian Government.

This course demonstrates Response Management procedures that are both practical and flexible as well as being easy to understand. A critical incident is usually unforeseen and most often has to be dealt with using limited, or inadequate, resources.

“ **Amateurs train until they get it right, Professionals train until they cannot get it wrong** ”

Most Companies already have plans in place to deal with a critical incident however it is common that when an actual critical incident occurs, nobody knows how the plan should be implemented. A Response Management Plan can sometimes sadly be a document that simply sits on a shelf in an office.

Whilst most companies use theory based training, the 360 BSI & Australian School of Security and Investigations uses true to life training scenarios that require course participants to make decisions under difficult and stressful conditions whilst under the guidance of our professional and experienced instructors.

COVERAGE

- Regulatory Environments
- Communications: Problems and Solutions
- Failure to Identify Hazards
- What is Operator error
- Handling Stress in a Response
- FEMA Threat
- Vulnerability Assessment
- Risk Analysis
- Occupational health and safety
- Response Management Plans
- Designing Reporting Systems
- Critical Incident Staff Selection
- Media Management

COURSE CONTENT

DAY1 RESPONSE MANAGEMENT

THEORY AND PRACTICAL BASED SESSION WHICH COVER

- Response Management – What is it?
- Regulatory Environments – The role of Regulators
- Hazard Identification
- Staff Selection and Training
- Staff Training
- Response Management Plans

EXCLUSIVE CASE STUDY

The Australian Longford Esso Gas Plant Explosion

DAY2 EFFECTIVE COMMUNICATIONS

THEORY AND PRACTICAL BASED SESSION WHICH COVER

- Effective Communications
- Planning Techniques
- Analysis of Information
- Team Briefing
- Occupational Health and Safety
- Radio Protocols
- Using equipment during Critical Incidents
- How to manage the Media

DAY3 REAL LIFE PRACTICAL EXERCISES

THEORY AND PRACTICAL BASED SESSION WHICH COVER

- Full day practical exercise involving the setup of a realistic scenario involving a pre-arranged incident that is relevant to the participant's workplace.
- This exercise will require course participants to be actively involved and work as a team in relation to managing a critical incident that has occurred.
- Participants will be under pressure and be making split second decisions under the watchful eye of Adrian Francis.

The enclosed information is a general overview of the course we offer. However each course can be tailored to suit individual client needs. The type of scenario training and resources utilised is dependent upon environmental, legal and geographical constraints.

The 1998 Esso Longford (Australian) gas explosion was a catastrophic industrial accident, killing two workers and injuring eight.

Gas supplies to the state of Victoria were severely affected for two weeks. The fire at the plant was not extinguished until two days later. The sudden crisis was devastating to Victoria's economy, crippling industry and the commercial sector (in particular, the hospitality industry which relied on natural gas for cooking).

Loss to industry during the crisis was estimated at around AUD\$1.3 billion.

"Sharjah Police confirmed the fire started at 2.30am at the Emirates Oil Refining Company (ERCO) and was contained at 11.30am. Police rushed to isolate the premises and remove nearby workers, boats and machinery in order to limit the damage." (*Ahmed Ramzan/Gulf News*)

"Lieutenant General Saif Bin Zayed Al Nahyan, Minister of Interior, said coordination by officials and quick response by the rescue and ambulance department officials helped save lives and in reopening the road at the earliest"

The Death Toll From Aramco Pipeline Blast in the Eastern Province Jumps to 40 (*Faiz Al-Mazrouei, Arab News*)

case study for discussion

WHY THIS COURSE

The Certificate in Emergency Response Management course is designed and delivered for any industry where there is a potential risk to their employees or infrastructure from internal and external threats.
