COURSE OVERVIEW

The Advanced Certificate in Critical Infrastructure Security: Risk Management & Investigation is a formally recognized qualification and is also recognized at higher education level. The units contained within the certification are endorsed by the Australian Ministry of Education & all Australian Police Services.

This hands on course takes a practical approach in identifying and responding to threats and safety issues relevant to your people, buildings and infrastructure.

Delegates learn how to assess and investigate risk so that procedures can be put in place and changes made to minimize risk and therefore reduce the likelihood of an incident.

Many companies are only reactive in their approach to risk. If a safety matter is brought to their attention then action is taken. This course looks at pro-active ways to investigate risk and locate flaws in operating procedures and systems before they escalate.

EXCLUSIVE CASE STUDY – Mumbai Terrorist Attack

The monetary benefits to any company using a Pro-Active approach can be substantial as you are identifying threats and issues before they happen, not after they happen.

Whilst most companies use theory based training, the 360BSI & Australian School of Security and Investigations uses true to life training scenarios that require course participants to make decisions under difficult and stressful conditions whilst under the guidance of our professional and experienced instructors.

SPECIAL BONUS

Participants will receive a comprehensive training manual in PDF format. This will provide you with comprehensively tested training material to guide you in training your security team when you return to work.

“ Amateurs train until
they get it right,
Professionals train until
they cannot get it wrong ”

This programme will develop the core skills needed to assess and protect your infrastructure against Security and Risk threats. The training is both practical and realistic and is relevant to your working environment.

TESTIMONIALS (FROM RECENT TRAINING IN JEDDAH)

- 1 'Adrian Francis is one of the greatest professional men I have ever met in my job field. With this course he cleared some hidden ideas I missed. I wish to meet him again and again'
- 2 'This is the first training class where I felt all training material was delivered successfully through many practical exercises.'
- 3 'The course and trainers way of delivery kept us up to date with all course items and is very excellent.'
- 4 'I would like to extend my appreciation to Mr Adrian Francis with his excellent co-operation and helpful and he keep me interested to learn more and new information which I hope will reflect in my job'

YOUR INTERNATIONAL COURSE FACILITATOR

Adrian Francis

Dip.Sec.Man., Grad.Cert.Man., Dip.Gov.Inv.

COURSE CONTENT

ALL SESSIONS WILL BE THEORY AND PRACTICAL BASED

DAY1 KNOWING OUR ENVIRONMENT

- Understanding the environment we work in
- Building design – Security and Safety implications
- Staff and External Contractors – Considerations
- Threat Assessment & Management
- Natural Disasters
- Planning for Terrorism
- ★ Practical Exercise – Exposing Security Flaws. This exercise is designed to provide a practical and sometimes disturbing demonstration of the flaws in building and infrastructure security.

DAY2 MANAGING OUR ENVIRONMENT

- Legislation affecting the Security of Critical Infrastructure
- Occupational Health and Safety – Your obligations
- Planning for the unknown
- Intelligence gathering – What do we do with information?
- Indicators & Identifying potential threats
- Effective Communications
- Emergency Evacuation procedures – What should we consider?
- Drills – How to make them effective
- ★ Practical Exercise – Communications – This practical exercise is designed to demonstrate the importance of clear and descriptive communications using a range of equipment.

DAY3 EFFECTIVE RESPONSE & INVESTIGATING INCIDENTS

- Emergency Response – What does the first person on scene do?
- Working as a team
- Communications Management & Systems
- Checking your Resources
- Talking to the Media
- Business Continuity – Do you have a plan
- Determine method of investigation & tools
- The Incident Scene & Preserving Evidence
- Surveillance, criminal and factual investigation techniques
- Interviewing Witnesses & gathering information
- Compile investigative report
- Delegating & Liaison with Management
- ★ Practical Exercise – Surveillance & Reverse Role Play – This exercise is designed so that delegates look at Infrastructure Security risks from a different perspective. This is a very powerful and eye opening exercise and is used in many of our training courses to great success.

The enclosed information is a general overview of the course we offer. However each course can be tailored to suit individual client needs. The type of scenario training and resources utilised is dependent upon environmental, legal and geographical constraints.

COVERAGE

- Regulatory Environments
- Communications: Problems and Solutions
